Education

National Technological University (Universidad Tecnológica Nacional)

Information Systems Engineering

Buenos Aires, Argentina

Jan 2022 — Nov 2026

Experience

Senior Full Stack Developer

Auditoria General de la Ciudad

Dec 2023 — Present

Buenos Aires, Argentina

- **Architected and deployed** scalable web applications utilizing **PHP/Laravel** and **Livewire**, ensuring high availability for city-wide auditing processes.
- **Optimized database performance** by refactoring complex SQL queries into efficient Eloquent ORM operations, significantly reducing server response times for data-heavy requests.
- **Modernized core ERP functionality**, leading the migration of legacy modules to web-based solutions used by multiple interdisciplinary departments.
- **Streamlined Agile development cycles** by enforcing code review standards and contributing to sprint planning, resulting in faster feature delivery.

Java Developer

PetBA Inc.

Dec 2021 — Nov 2023

Buenos Aires, Argentina

- **Developed robust desktop ERP solutions** using **Java SE** and **Swing**, handling complex business logic and internal workflows.
- **Implemented secure data persistence layers** using **JDBC** and **PostgreSQL**, ensuring data integrity for high-volume transactions.
- **Designed intuitive GUI modules**, translating user requirements into functional interfaces that improved employee productivity.

Full Stack Developer

Blockchain Foundation

Feb 2024 — Present

Remote

- **Engineered modular user interfaces** within a complex microservices architecture, utilizing **Angular** to ensure seamless integration with distributed backend systems.
- **Designed a library of reusable Angular components**, reducing development redundancy and enforcing UI consistency across the application ecosystem.
- **Enhanced application scalability** by implementing state management patterns and optimizing client-side rendering performance.

Skills

Languages: PHP, Java, SQL, TypeScript

Frameworks: Laravel, Spring Boot, NestJS, Angular, React, Vue.js

Tools & Platforms: Git, Docker, Linux, AWS, PostgreSQL, Livewire

Projects

E-commerce | *NestJs, PostgreSQL, Vue, Vercel, Render, Neon, TypeScript*

Feb 2025 — Mar 2025

- Developed a full-featured e-commerce platform for a diet shop, including user authentication, payment processing, product catalog, shopping cart, and order management modules.
